

# Passion Project: Skinful

## Welcome to Skinful!

Skinful is a skincare tracking app that will allow users to track their daily skincare routine, including the products they use and changes in their skin. Users can input their skin type, concerns, and the current products they are using in their routine. The app will also allow users to take photos of their skin to track changes over time, as well as log any skin treatments they have received such as facials or chemical peels. Additionally, the app will include educational resources on different skincare ingredients and techniques, as well as a community forum for users to share tips and discuss their skincare journey.

*Here are some features that can be found in the app:*

- A customizable skincare routine tracker: add their current products, frequency of use, and any professional skin treatments they have received.
- A daily log: users can input how their skin is feeling/ what they notice about their skin each day.
- A progress tracker: keep track of their skin changes over time by adding photos and notes to their progress logs
- A product database: browse through a database of skincare products based on their skin needs that include a list of ingredients and reviews.
- A community forum: share your experiences and get advice from other users in the app's community forum.

Overall, Skinful will be a helpful tool for anyone looking to improve their skincare routine and keep track of their progress.

Skinful hopes to be a part of and help people in their journey to healthy, radiant skin!
